

# Building Green

## The Sustainable Advantage

Building Green the Sustainable Advantage Seminar is brought to you by Sustainable Business Network, Eco Design Advisor Hamilton City Council and supported by Wintec and the Waikato Chamber of Commerce.

This seminar offers real information about sustainable building today. We'll challenge you to look at the opportunities and risk and see how you could be involved whether it's residential or commercial building and why this makes good business sense. And we'll be looking at where to from here?

You will gain an insight into sustainable building from an impressive line up of speakers whose knowledge and experience will illustrate that we need to consider more than just the bottom dollar that the economic value links to the health, social and environmental benefits long-term.

Presenter Jane Henley, CEO of the NZGBC will give a brief overview of the Green Star Green Building rating system, and the impact it is making across the country. Jane will outline new developments for Industrial, Education and Residential buildings including some of the Green Star projects currently underway.

Case studies of an office building, winery, school classroom and residential home will be discussed with topics from energy, waste, interior environment, materials, water and the issues and challenges around cost, design and construction.

- 4 Star Kakariki House here in Hamilton East presented by Amanda Bryant from Connell Wagner.
- The Case for Eco Classroom at Hukanui School presented by Antanas Procuta from Antanas Procuta Architects
- Proposed 5/6 star Industry rated Yealands Winery presented by Paul Lloyd from Apollo Projects
- Residential Eco rebuild presented by John Dennis.

The event will conclude with networking opportunity 5pm-6pm including drinks and nibbles.
