

Friends of Permaculture invites you to

An Introduction to Grafting

Ever wondered how to get the best of both worlds ... old world fruits on improved disease resistant root stock? ...short on space but would like more fruit varieties? Perhaps grafting is the answer.

In an informal setting in Wendy's orchard, Clyde and Di will share their knowledge and step us through some of the basics to be better prepared for a more formal class in grafting(July/August).

We will cover:

- What materials and equipment you will need
- How to take scion wood (the branch thats grafted on)
- What you need to consider when selecting root stock

Wendy's Orchard, 130 Holmwood Drive, Ngahinapouri

Saturday 25th April, 3-5pm

Please bring a notepad & pen, drinks and food to share for afternoon tea.

RSVP by Apr 21 to Wendy
