

# Creating Healthy Homes Workshop

*Are you interested in the health and wellbeing of your  
Community?*

*Do you work directly with families or do you work with  
organisations that do?*

When our homes are damp and cold they get expensive to heat and the people who live in them get sick more often.

However, there are many tools for making a home dryer and warmer. Many of these are free or very cheap to implement. More often than not, the issue is about awareness of the problem(s), and then knowing what to do about it.

Come to our FREE workshop for some simple strategies and expert advice on how to incorporate effective 'Healthy Homes' messages and practices into your everyday work.

Book now to secure your place on these sought after workshops!!!  
These Workshops are ideal for anyone.

**Facilitator:** Ian Mayes - Hamilton City Council - Eco Design Advisor

**The cost: Free!**
