

IT'S [NOT] EASY TO BE GREEN

A COMMUNITY FOR THE ENVIRONMENTALLY AWARE

It's [not] Easy To Be Green is a group for sharing knowledge, time and resources to help members in their pursuit of a more eco-friendly and sustainable lifestyle. We welcome seasoned greenbees (the name we've given our members) as well as those who are newly interested in this way of living. The group will meet once a month to discuss a dedicated topic and additional events will be added as they arise. The group is co-ordinated through the website meetup.com.

THIS GROUP SUPPORTS:

- ➡ **Reuse:** Avoid single use items, find a reusable alternative. Repurpose items instead of throwing them away.
- ➡ **Make / fix it:** Make or grow your own instead of buying mass produced. Consider fixing before replacing.
- ➡ **Swap it:** Share resources and swap produce, goods, ideas, skills and knowledge.
- ➡ **Buy responsibly:** Buy from companies who are are cruelty free, environmentally conscious and follow sustainable practices. Support local farmers and industry.
- ➡ **Off grid living:** Generate your own power, collect your own water, manage your own household waste, grow your own food.

If this sounds like a bit of you go to <http://www.meetup.com/its-not-easy-to-be-green/> and join the group.

First meeting: Saturday, 25 June at 4pm
